Victoria division

AIRAH achieving recognition

Innovative product workshop

Tuesday, 5th December

Come and enjoy the last VIC division meeting for 2007…….

John Bennett, state manger of Air Change, will give in insight into the technology behind Air Changes equipment range. At the heart of all of Air Changes products lies either an 80% efficient sensible only or a 75% efficient total (sensible and latent) plate heat exchanger.

Australian designed and manufactured and internationally patented, the Air Change product range is comprehensive, and caters for virtually any commercial or industrial application.

Daniel Harris, Senior Mechanical Engineer, Dadanco, will present the range of Active Chilled Beams (ACB) systems. These combine modern developments of induction nozzle technology with conventional chilled water HVAC concepts to produce solutions for energy efficient HVAC designs. Daniel will cover the operating principles and the benefits of ACBs. He will also provide an overview of ACBs as product capable of being designed to solve different air delivery and comfort problems in HVAC systems.
